

A SIMPLE WAY TO SELL YOUR SURPLUS OR COVER YOUR DEFICIT!

VERTIS EUA, EUAA AND CER SPOT TRADING

THE OPPORTUNITY

Spot trading gives you a fast and simple way to sell your surplus, cover your short position or monetise your allowances in the EU Emissions Trading Scheme. With no credit checks or lengthy documentation, spot trading is perfect for operators wanting to manage their position regularly, or once a year.

The main characteristics of Vertis Spot Trading are summarised below:

FEATURES AND BENEFITS	DETAILS
Best price	Vertis buys and sells emission allowances on the OTC market or on one of the CO2 exchanges at the best market price .
Fast and safe process	Transactions are executed within minutes . In most cases, we transfer you the purchase price or the purchased allowances the same day.
Simple, short framework agreement	The short and simple framework agreement allows you to buy/sell at any time in the future by giving Vertis an offer via phone, myvertis, fax, email or Skype.
No hidden fees	Vertis offers a net price, and does not charge any transaction or hidden fees.
Expert discussion	You can always call us to discuss market information, or to structure a transaction tailored to your needs.

TRANSACTION PROCESS

The spot transaction process consists of the following four simple steps:

1. Monitor the prices with the assistance of Vertis experts who can also help you with market fundamentals. When you think the time is right, give an offer to Vertis with your limit price and volume.
2. Transfer the emission allowances to be sold or the necessary funds to Vertis as a deposit.
3. Vertis executes the transaction at the best price for you based on your offer. Giving a limit price means that if price movements on the market allow it, Vertis confirms to you the transaction at a better price than your limit. If your offer is not within current market prices, you can monitor the market with your Vertis trader and modify or cancel your offer. Unused deposits can be refunded at any time.
4. After executing the transaction, Vertis transfers the purchase price to your bank account or the purchased allowances to your registry account the same day.

ABOUT VERTIS ENVIRONMENTAL FINANCE

Established in 1998, Vertis Environmental Finance was one of the first companies in the world to be involved in the carbon markets. Our multinational team of carbon trading experts, membership or direct access to two exchanges (ICE and EEX) and OTC trading relationships with more than 1000 operators and financial institutions across Europe guarantee our clients an award winning* personal service, best prices, and fast and safe transaction processes. (*Vertis won Point Carbon Best Carbon Broker in 2011 and was voted Energy Risk Best Emissions Dealer in 2015, and Best Research in Emissions in 2017.)
